### Curriculum Design for English at Cranbury College

Our curriculum is designed to provide students with the opportunities for a rich and deep love of the study of English Language and Literature, whilst also equipping them with the skills, knowledge, and qualifications they need for the future. As part of a whole school approach, we aim to develop secure reading, writing, and speaking literacy skills- so that students leave Cranbury being able to express themselves successfully and empathise with anyone they encounter in their futures.

We know that some students who arrive at Cranbury can find literacy challenging. To help them, we run programmes that will help students not only access the curriculum but survive in the modern world. We recognise that good reading skills are often the key to ensuring a successful future for many of our young people and choose literature and activities that will help inspire them to move forwards. In Key Stage 4, we offer qualifications from Pearson Entry Level Functional Skills to AQA English Language and students are constantly assessed to fit them in to the right qualifications.
