Curriculum Design for Hair and Beauty at Cranbury College

Our curriculum is designed to provide students with an insight into the world of Hair and Beauty. Students are able to develop and hone their skills, whilst working in a small nurturing salon environment, they can take an active role within lessons and take ownership over their educational journey. Students will have opportunities to develop their practical skills, discovering their creative side, whilst developing theoretical knowledge of the industry.

Some students at Cranbury College find Academic subjects challenging and prefer a more 'hands on' approach to their learning. Some students are only with us for a short period of time, AQA unit awards have been chosen to accommodate all our students' needs regardless of how long they are at Cranbury College, they are used to boost confidence, engagement, and motivation as well as the desired transferable skills required to be successful in any future work placement. Each unit gives a valuable insight into industry, where there are opportunities to progress to the next level.
