

## Paracetamol Consent Form

Cranbury College holds a supply of paracetamol, which can be given to your child if your child suffers from a minor medical ailment in school, provided that you have agreed the parental consent via My Child At School. Paracetamol tablet or liquid paracetamol will be administered by a qualified First Aider. Dose will be dependent on package instructions.

Consent will confirm that you agree that your child can be given over the counter, non-prescription medication appropriate to their age, in school, following verbal consent from a parent/carer by telephone.

A qualified first aider will contact you in the event of such a necessity, having assessed the situation before administering medication.
